

ADVANTAGES OF **STERAMIST**[®] DISINFECTION OVER
CLOROX[®] TOTAL 360[®] SYSTEM

SteraMist[®]

SteraMist[®] BIT[™] is the first EPA registered Equipment + Solution for Healthcare-Hospital Disinfecting. BIT[™] solution has a sole active ingredient of 7.8% hydrogen peroxide.

(EPA Reg. No. 90150-2)

SteraMist[®] BIT[™] is EPA registered as Effective against *C. difficile* spores.

Does NOT require a wet contact time (EPA label contact time 5 seconds per ft²). Only requires about 7 minutes to remove equipment from room.

Disinfection on surface **including high-touch, sensitive equipment, and electronics.**

Clorox[®] Total 360[®]

The Clorox[®] Total 360[®] System is an electrostatic sprayer and solution combination. Total 360[®] Disinfectant Cleaner solution has multiple active ingredients.

(EPA Reg. No. 1839-220-67619)

Clorox[®] Total 360[®] System does not have approved EPA for *C. difficile* spores.

Requires a minimum of 5 minute wet contact time to kill certain bacteria and inactivate certain viruses.

Should NOT be applied directly to any sensitive electronics. All surfaces must be “thoroughly wet” to ensure wet contact time.

SteraMist®

Clorox® Total 360®

Leaves no residue and does not contaminate the environment with any toxic by-products. **Fragrance free, bleach free.**

Physical kill by destroying bacterial cell wall. **High log kill** of bacteria, bacteria spores, fungus spores, and viruses. Product performance is supported by GLP efficacy data. Can be used for outbreak preparedness and **EPA registered including, List K: C.difficile, List G: Norovirus, List M: Influenza A, and List L: Ebola.**

Patented iHP™ technology. Particle size **0.05-3 microns.** Aerosolized microns spread like a gas.

PPE required: PAPR or N-95, goggles, gloves, long sleeves, and long pants. (*TOMI™ Environmental Solutions recommends MaxAir™ PAPR system*).

Wiping is recommended to remove visible residue after the contact time is achieved.

Clorox® Total 360® Disinfectant Cleaner is a quaternary based disinfectant.

3-log kill of S. aureus and K. pneumoniae.

Electrostatic technology to distribute disinfectant cleaner to surfaces.

Particle size >40 microns.

PPE required: N-95, goggles, and gloves. The Clorox® Total 360® System has been evaluated in non-healthcare environments only.

QUICK. EASY. EFFECTIVE.
